PROFILE

Cybersecurity student with a strong interest in defensive security and security operations. Academic and hands-on experience in network and system security, monitoring and traffic analysis, vulnerability assessment, and incident analysis. Familiar with blue-team workflows, including detection, investigation, and security reporting, with a baseline understanding of offensive security through penetration testing labs.

EDUCATION

Bachelor's in Cybersecurity– GPA: 3.78

08/2023 – Present

Umm Al-Qura University

My coursework covered areas including network security, system and application security, ethical hacking, vulnerability assessment, cryptography fundamentals, security planning and policy, and secure system design. I gained hands-on experience with penetration testing labs, Linux environments, network scanning and exploitation tools, threat modeling, and incident analysis, alongside practical projects involving secure web systems, databases, and network configurations. My studies emphasized both the technical and managerial aspects of cybersecurity, including risk management, security governance, and organizational security planning.

SKILLS

Bash scripting	Network scanning and enumeration (Nmap)
SQL fundamentals	Network traffic analysis (Wireshark)
Vulnerability assessment & exploitation	Cryptography fundamentals

CERTIFICATES

IELTS ACADEMIC
BAND SCORE: 7 - 2021

Cybersecurity Concepts and
Fundamentals
Dimensions Group – 2022

eJPT (Junior Penetration
Tester)
INE - 2026

LANGUAGES

English -Bilingual	Arabic -Native
-----------------------	-------------------

PROJECTS

Threat Modeling using STRIDE and LINDDUN – University Project

Applied STRIDE and LINDDUN threat modeling techniques to analyze system and data-flow diagrams. Identified security and privacy threats and proposed mitigation strategies as part of course assignments.
